EDUCATION

Pan-Atlantic University Lagos, Nigeria
BSc. (Hons.) Computer Science — First Class Honours Expected 2027

- Relevant coursework: Object-Oriented Programming, Database Management Systems, Operating Systems, Software Engineering, UI/UX Design, Computer Networking, Web Design and Development

Fountain Heights Secondary School September 2017 – August 2023

- Graduated as Valedictorian; served as Social Prefect, organising school-wide events

EXPERIENCE

Tonative
AI Engineer April 2026 – July 2026

- Upgraded the company website using Next.js, TypeScript and Tailwind CSS
- Built the frontend of an AI translation dashboard with React, TypeScript, Redux Toolkit and RTK Query, covering file upload, translation engine configuration, job status tracking, a results preview table and a history view
- Integrated the backend translation status, results and download APIs
- Resolved a React Server Components rendering conflict

DHL International Lagos, Nigeria
IT Support Intern July 2025 – September 2025

- Resolved hardware and software issues using structured troubleshooting, reducing ticket resolution time
- Configured and deployed computers for new hires to company standards before onboarding
- Diagnosed and resolved network connectivity issues, maintaining uptime for end users
- Managed support tickets in ServiceNow (ITSM) with accurate records and SLA compliance, following data handling and privacy policies

Africa Fintech Foundry (Hackathon) Lagos, Nigeria
Programming Intern July 2024 – September 2024

- Developed and presented practical technology solutions in Java with a cross-functional team under time constraints
- Took part in workshops on software development and emerging fintech technologies (Access Bank)

Freelance Graphic Designer Remote
Designer 2024 – Present

- Designed custom marketing posters for small businesses, strengthening their digital brand presence

PROJECTS

SIBAS – Student Information and Biometric Attendance System Group project
Database Administrator & Software Developer December 2025 – Present

- Automating PAU's manual attendance process with PostgreSQL and Python: ER diagram design and a fully normalised schema
- Building a browser-based Streamlit frontend with role-based access control for Administrator, Lecturer and Student roles
- Implemented hashed password storage, session management and parameterised queries to prevent SQL injection
- Developed per-course attendance scoring that flags students below 80%, with CSV and PDF report export, bulk CSV registration and lecturer-run sessions with manual correction

Sante Diagnostics JavaFX, PostgreSQL
Developer – Laboratory Information Management System Course project

- Built a LIMS with three roles (super admin, lab attendant, customer) and user management with forced password change on first login and account deactivation
- Created a test builder for managing test types and a card-based request queue with payment confirmation

P2P Tutorials React, TypeScript
Frontend Developer In progress

- Building the frontend of a PAU peer tutoring platform from Figma designs, with tutor and tutee sign-up flows, a dashboard and an FAQ page

ShopSphere React, REST APIs
Full-Stack Developer 2026 – Frontend completed

- E-commerce platform with product listings, cart management and checkout; responsive React frontend connected to backend services through RESTful APIs

PAU Café JavaFX, PostgreSQL
Developer 2026

- Desktop ordering app for the campus café with role-based login, menu search, cart, wallet balance, order history and a manager dashboard for menu management

CineMatch Data Science & AI
Developer 2026

- Developed and deployed a movie recommendation system using collaborative filtering and content-based recommendation, and built its frontend

Unipath 360 Product design
Product Designer & Researcher 2025

- Designed a mobile-first university application guidance concept for Nigerian secondary school students, using the NABC framework and end-to-end Figma wireframes and prototypes
- Projected a 40% reduction in application errors, 60% less research time and savings of ~~₦~~400,000–~~₦~~900,000 per family in agent fees

Portfolio and Client Websites Remote
Web Developer & Designer 2025 – Present

- Built a Sudoku-themed portfolio in HTML, CSS and JavaScript with data-driven project pages, hosted at mdavid001.github.io/solved
- Designed and built an email marketing portfolio site for client Adaeze Victoria Simon, deployed on Vercel

Network Infrastructure Project Cisco Packet Tracer
Network Engineer 2025

- Built a multi-department network with EIGRP and OSPF routing, DHCP, static IPs and ACLs

CERTIFICATIONS

Virtual Assistant Program May 2026
Vsavvy Academy

LEADERSHIP & ACTIVITIES

Junior Achievement (JA) Nigeria School Chapter
Chapter President October 2022 – October 2023

- Led a team of 20+ students running entrepreneurship workshops and financial literacy programmes
